Hi Greg, Chris,
We will make it happen, bear with us as the majority of the team will be in Cannes next week for the Cannes Lions.
May I come back to you with some proposed dates in a couple of days?

Silvia

I've also briefed the design team here on it and the potential. Would be great to give Colin and Andy on our design team a demo of how your approach works, we've a number of shoots in progress and discussions with other suppliers about more traditional shoots for own brand and the costs are very comparable.

Keen to let Andy and his team lead on the design front and better understand how working with Seed would work from their perspective.

We've two own brand projects in particular where this would be a great trial on Power Tools with Roktor, and Maverick Workwear which is always a challenge to shoot.

Could i get some time in the next week for you guys to give them a virtual demo on a call?

thanks
Greg

Hi Chris,

I hope you are very well today.
I've been working with the Seed team to try and build some specificity into a cost proposal based on those three use cases we have identified.

- Use case 1: Elevating our paid media with enhanced product imagery
- Use case 2: Providing secondary marketing assets to supplement 'hero' campaigns
- Use case 3: support own-brand product launch

Please see a summary of what we see the output and costs being for each one below, we've bundled the costs for 1+2 as there is a lot of cross over.
I think in terms of next steps, we work on identifying where any trial could have the most demonstrable impact so we can build a stronger business case for ongoing deployment back to the business.

Use case 1: Elevating our paid media with enhanced product imagery

- **Summary**: This would be a volume game whereby for our top products or NBP (next best products) SKUs, we are able to produce video assets at scale to improve the engagement of our ads.
- **Typology of assets:** (video) + Volume (30 Videos for Social and 30 cutdowns for Search) - as each month, 25 SKUs are driving 10% of the revenues, so one video each according to Harry + Length of videos 5" for Search and 15" for Social
- **Deliverables**: 30 x Paid Social Videos (15") x up to 3 sizes + 30 x Paid Search Videos (5") simpler versions of Paid Social Videos x up to 3 sizes.
- **Cost**: Bundled with Use case 2

Use case 2: Providing secondary marketing assets to supplement 'hero' campaigns

- **Summary**: Taking the 'Next Stop Toolstation' campaign as the example, we can use Seed's capabilities to provide a larger number of campaign-led assets for secondary placements/use cases:
- **Typology of assets:** (Category landing pages + Paid media activations/amplifications + Secondary marketing placements (YouTube, TikTok - i.e. create platform native variations) + Email campaign landing pages.
- **Deliverables**: 12 x Secondary Marketing Videos (up to 15" each) x up to 3 sizes each. Across 3 months Toolstation can release 4 new videos per month
- **Cost (use case 1 + 2)**: £32,105
- **Delivery Timing for Bundle (Use case 1 & 2):** 4 weeks for main delivery then 1 week per feedback round after, 2 feedback rounds, total 6 weeks turn around for entire project (Use case 1 and 2)Across 3 months Toolstation can release 4 new videos per month

Use case 3: support own-brand product launch

- **Summary**: to support the launch of the Rocktool line with wide range of creative assets
- **Deliverables**: 4 x Secondary Marketing Videos (up to 15" each) x up to 3 sizes each.
- 10 x Paid Social Videos (15") x up to 3 sizes + 10 x Paid Search Videos (5" simpler versions of Paid Social Videos) x up to 3 sizes
- Bank of product imagery (stills) = 50 images, cut outs provided by the client, comped on backgrounds
- **Cost**: £16,000

- **Delivery Timing for Bundle:** 2 weeks first draft, 1 week per feedback round after, 2 feedback rounds so 4 weeks total.

Assumptions: For usage, we are handing over full usage for client (all channels, global, in perpetuity), but we would need to retain the ability of using the content for our own publicity and case studies. We also assume that if Toolstation will provide Seed with any content to be use as part of the assets we are creating. they will have full usage rights on those.

Lots to digest, happy to setup a call/meet to review together.

Kind regards,
Harry

Hi Harry - just catching up on emails.

Yes, let's look at both use cases.

Let us know when you are ready with a proposal.

Chris

This would be a volume game whereby for our top products or NBP SKUs, we are able to produce video assets at scale to improve the engagement of our ads. We're working on some pricing structures based around # of assets per month against a base number of 'backdrops' etc.
> - Use case 2: Providing secondary marketing assets to supplement 'hero' campaigns. Taking the 'Next Stop Toolstation' campaign as the example, we can use Seed's capabilities to provide a larger number of campaign-led assets for secondary placements/use cases:
